GP-3350
Gel Body Positioners

The Candy Cane Style Legholder Ankle Straps are made from viscoelastic gel that offers the highest quality and most comfortable positioners available with superior anti-shear protection. The fluid-resistant gel helps protect against skin tissue breakdown and other types of costly post-operative damage. They are Latex free, fluid resistant, reusable and covered with a membrane-like coating for easy clean up. Patient safety straps are made specifically for the medical industry to help and insure the patients stability and proper positioning.
