

...LESS TO WORRY ABOUT!

The Bovie® 3-Button Handpiece – Better By Design, Inside And Out

The basic function of a 3-button handpiece is to allow the user to control power up/down and to activate the high frequency desiccator. The Aaron 940™ has a technology advantage right in the handpiece: a superbly engineered collet that's even gold plated for superior conductivity. The collet is attached to our circuit board and the entire handpiece is encapsulated and formed in a high tech polymer that combines comfort for you with a sure grip. The buttons on the handpiece have been designed for superior tactile feel and comfort. Finally, it's autoclavable so you can have sterility when you need it, and an easy to clean and durable handpiece all the way around.

Digital Error Detection

Digital error detection means unsurpassed safety for you and your patient. The Aaron 940™ continuously monitors every aspect of the unit's output. At the sign of any problem the machine instantly disables the output and displays the appropriate error code on the display.

Designed For Years of Trouble-Free Use

The Aaron 940™ is designed and engineered to be the most reliable and durable desiccator available today. The unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Post-procedure and long-term cleanup are simplified by its non-absorbing, nonstaining, high-impact plastic case.

STANDARD EQUIPMENT

- A940 Unit, Power Cord
- Handpiece (A901)
- 50 Non-sterile Disposable Sharp Dermal Tips (A804),
- 50 Non-sterile Disposable Blunt Dermal Tips (A806),
- Wall Mount Kit (A837),
- User's guide

...MORE and LESS!

• MORE POWER

with 40 watts

• MORE ACCURATE BI-POLAR

increase and decrease in 1/10th watt increments from zero to ten watts

• MORE ACCURATE POWER

with Universal Power Control...100–240 VAC

• LESS TO DO

with fewer steps to accomplish the same procedures

• LESS TO BUY

Fewer accessories needed for additional functionality

• MORE USER FRIENDLY

with features that can save you time and money

Hand Control For Low & High Power

Return Electrode

Bipolar

Foot Control

Autoclavable 3-Button Pencil

LESS TO BUY...
the same 3-Button Pencil works with or without the optional footswitch

LESS TO DO...
Simply plug in the optional footswitch and you are ready to go! Not only is the Bovie footswitch much more cost effective, but you don't need to replace the handpiece like you do on their device. The user has complete control including up/down power from the handpiece as well as activation...you have neither with the competition. Not only more user-friendly, but this saves you money too! **IT'S YOUR CHOICE.**

Additionally, the Hyfrecator's setup is much more complicated. "Time is money" and the six cumbersome steps it takes to change the Hyfrecator® 2000 from the 3-button handpiece to foot control can deplete both these valuable assets. Also note that the 6-steps must be reversed in order to go back to 3-button handpiece control.

Foot control handpiece and footswitch are sold separately and are both required for the ConMed® foot control option.

SO MANY STEPS ARE SUCH A WASTE OF YOUR VALUABLE TIME ...

STEP 1
Unplug 3-button handpiece from bottom of unit

STEP 2
Unplug 3-button handpiece from front of unit

STEP 3
Detach 3-button handpiece from holder

STEP 4
Attach foot control handpiece

STEP 5
Plug foot control handpiece into front of unit

STEP 6
Plug footswitch into bottom of unit

EVEN MORE STEPS TO GO FROM LOW TO HIGH POWER & JUST AS MANY TO RETURN TO LOW AGAIN!

STEP 1
Unplug the handpiece from the Lo power receptacle

STEP 2
Move the power selector switch from Lo to Hi

STEP 3
Plug the handpiece into the Hi power receptacle

STEP 4
Adjust the rotary dial or up/down buttons on the handpiece

VS

The Aaron 940™ allows the doctor to change the power setting with one action, using the rotary power-control dial or the up/down buttons on the autoclavable handpiece.

ACCESSORY ADVANTAGES...

FOOTSWITCH

A803 Footswitch, 1/box
