

GP-2850

Gel Body Positioners

The heel gel pads with molded heel indents are made from viscoelastic gel that offers the highest quality and most comfortable positioners available with superior anti-shear protection. The fluid-resistant gel helps protect against skin tissue breakdown and other types of costly post-operative damage. Kova Gel™ Pads are Latex Free, Fluid Resistant, Reusable and Covered with a Membrane-Like Coating for Easy Clean Up. Perfect for decreasing shear movement and reducing post-operative complications while providing maximum protection and comfort for the patient.

Features:

- 3" x 6" x 2.25" - 1 pair
- Anti-shear protection
- Provides support, stability, and elevation
- Latex free and fluid resistant
- MRI Compatible
- Fluid Proof
- Reusable - Easy to Clean
- Disinfectable

Materials:

- Kova Gel viscoelastic polyurethane gel
- Vinyl membrane covering
