

Freezpoint™

Colder than the Can!

MULTI-USE DISPOSABLE CRYOSURGICAL DEVICE

A safer, easier, and colder device, that delivers an improved, low cost per procedure, cryosurgical option. The Freezpoint™ device is 27% - 62% colder than common multi-use disposable systems. The slim tip design aids in clear visualization of the lesion for precise delivery of -89° C, non-flammable, Nitrous Oxide therapy. The outcome is a very safe and clinically effective treatment with reduced tissue damage to surrounding healthy skin. Freezpoint is conveniently available in 8 gram (CRY8) and 16 gram (CRY16) devices.

Indications Include:
