

Stryker 1079 Eye Surgery Stretcher - Refurbished

Stock Photo – Options May Vary

The Stryker 1079 Eye, Head, and Neck Surgical Stretcher offers the greatest head-end clearance in the industry. This stretcher features a dual articulating headrest for precision positioning of the patient during surgery and a gas spring assisted backrest.

This stretcher is ideal for either superior or temporal approach. Positioning controls tuck neatly within the headpiece and allow full articulation. The 1079 also features fold-down side rails, four IV receptacles, and four-wheel, steel-ring brakes with foot end brake and steer pedals.

The Stryker 1079 comes completely refurbished with a comprehensive warranty and a new pad.
